

We are updating our water intake records

- For **faster** and **instant** transactions
- **We benefit** from bill discounts

What does “updated water intake” mean?

It means that the bill is issued on the actual water intake user, on the actual consumer and the records in EYATH’s archive are fully updated (VAT, ID, phone number, e-mail)

What do we miss if we do not update our personal information

- 1) We cannot ask for a discount in case of leakage, correction of false charging, hydrometer check or make a settlement.
- 2) We cannot benefit from EYATH’s special tariffs (social, business, industrial) and discounts.
- 3) Due to personal data protection, our requests or questions concerning our water intake, cannot be met, since we are not the mentioned beneficiaries of the intake.
- 4) We cannot use EYATH’s online services.
- 5) We may cause problems in our water intake.
- 6) Especially if we are property owners, we rent our property and we do not make sure that our tenant has taken responsibility on the water intake, any unpaid bill will eventually be ours!

Attention: for legal entities and traders

The information update is mandatory for the proper transmission of EYATH’s documents to the digital platform myDATA of AADE (A. 1138/2020).
